No one can say what quantum mechanics means (and this is a book about it) — Quantum mechanics is not really about the quantum — Quantum objects are neither wave nor particle (but sometimes they might as well be) — Quantum particles aren't in two states at once (but sometimes they might as well be) — What “happens” depends on what we find out about it — There are many ways of interpreting quantum theory (and none of them quite make sense) — Whatever the question, the answer is “yes” (unless it’s “no”) — Not everything is knowable at once — The properties of quantum objects don’t have to be contained within the objects — There is no “spooky action at a distance” — The everyday world is what quantum becomes at human scales — Everything you experience is a (partial) copy of what causes it — Schrödinger’s cat has had kittens — Quantum mechanics can be harnessed for technology — Quantum computers don’t necessarily perform “many calculations at once” — There is no other...

Why do good teams kill great ideas? Loonshots reveals a surprising new way of thinking about the mysteries of group behavior that challenges everything we thought we knew about nurturing radical breakthroughs. Bahcall, a physicist and entrepreneur, shows why teams, companies, or any group with a mission will suddenly change from

Page 2/15
embracing new ideas to rejecting them, just as flowing water will suddenly change into brittle ice. Mountains of print have been written about culture. Loonshots identifies the small shifts in structure that control this transition, the same way that temperature controls the change from water to ice. Using examples that range from the spread of fires in forests to the hunt for terrorists online, and stories of thieves and geniuses and kings, Bahcall shows how a new kind of science can help us become the initiators, rather than the victims, of innovative surprise. Over the past decade, researchers have been applying the tools and techniques of this new science—the science of phase transitions—to understand how birds flock, fish swim, brains work, people vote, diseases erupt, and ecosystems collapse. Loonshots is the first to apply this science to the spread of breakthrough ideas. Bahcall distills these insights into practical lessons creatives, entrepreneurs, and visionaries can use to change our world. Along the way, readers will learn how chickens saved millions of lives, what James Bond and Lipitor have in common, what the movie Imitation Game got wrong about WWII, and what really killed Pan Am, Polaroid, and the Qing Dynasty. If The Da Vinci Code and Freakonomics had a child together, it would be called Loonshots.

exactly 50/50. A man sees a whale struck by lightning, and knows that everything about his life has to change. A lawyer grapples with the unintended side effects of a veterinarian's rabies vaccination. Fair warning: Raised in Captivity does not slot into a smooth preexisting groove. If Saul Steinberg and Italo Calvino had adopted a child from a Romanian orphanage and raised him on Gary Larsen and Thomas Bernhard, he would still be nothing like Chuck Klosterman. They might be good company, though. Funny, wise and weird in equal measure, Raised in Captivity bids fair to be one of the most original and exciting story collections in recent memory, a fever graph of our deepest unvoiced hopes, fears and preoccupations. Ceaselessly inventive, hostile to corniness in all its forms, and mean only to the things that really deserve it, it marks a cosmic leap forward for one of our most consistently interesting writers.

Working Papers in Cultural Studies

Elf on the Shelf Official Annual 2020

Find creative ways to make money in businesses with little competition Using interviews with unconventional entrepreneurs, the author's own wide-ranging experience with weird jobs, and extensive research, 101 Weird Ways to Make Money reveals unusual, sometimes dirty, yet profitable jobs and businesses. Whether you're looking for a job that suits your independent spirit, or want to start a new business, this unique book shows you moneymaking options you haven't considered. Most of these outside-the-box jobs don't require extensive training, and are also scalable as businesses, allowing you to build on your initial success. Jobs and businesses covered include cricket and maggot farming, environmentally friendly burials, making and selling solar-roasted coffee, daycare services for handicapped children, and many more. Each chapter features a "where the money is" section on how to scale-up and be profitable. Author writes a popular website and email newsletter on unusual ways to make money. Whether you're seeking a new career, an additional revenue stream, or a new business idea, you will want to discover 101 Weird Ways to Make Money.

Weird Emptiness

In highly polished prose filled with humor and perception, this individual take on what it means to be a writer offers insight into aesthetics, metaphysics, ethics, and logic. The witty aphorisms and essays draw from the author's influences Blake, Cervantes, Kierkegaard, Neitzsche, Baudelaire, and Kafka and comment on the writing process. This epistemology is at once literary criticism of these influences and a deep and tender philosophical chronicle of a writer's life.

Black & White & Weird All Over: The Lost Photographs of "weird Al" Yankovic '83 - '86

Most people try to fit in, struggle to be the same as the others when in reality they were born to be unique and different. Being weird is being unique. Voices, Visions and Strange Ideas

"Weird Al" Yankovic is one of music's most beloved figures. A skilled accordion player and songwriter, the California native is known for his meticulous parodies of popular songs, hilarious originals, and, of course, for upbeat polkas! For much of Al's career, one man has been by his side, photographing and documenting the fun and weirdness: longtime drummer Jon "Bermuda" Schwartz. Since meeting Al in 1980, Jon has taken more than 20,000 images of Al in his element: on tour, in the studio, and on video sets. Black & White & Weird All Over presents hundreds of images of Al, culled from Jon's personal collection of black-and-white photography. These photos only existed on contact sheets - out of mind and out of sight - until now! From behind-the-scenes shots taken on the sets of Al's iconic videos for "Ricky," "I Love Rocky Road," "Eat It," and "Living With A Hernia," to studio sessions for Al's Dare to Be Stupid and Polka Party! LPs, Black & White & Weird All Over is the ultimate photographic essay of Weird Al's undisputed comedic genius.

Weird Thoughts & Pure Gold Ideas

We all know that some of the greatest inventions came from the Victorian age, the successors of which are still with us today. But this book is not entirely about those. It's more about some of the weird and wonderful inventions, ideas and projects some successful, others less so that have largely been forgotten. Where well-known inventions or design concepts are included, it is from a perspective not previously appreciated, with details of the ingenious technology and thinking that led to their introduction and success. Here you can read how
Victorian innovators were responsible for: the world's largest glass structure; an electric railway with lines under the sea and a carriage on stilts 20 feet above the waves; a monster globe that visitors could enter to see the world's land masses, seas, mountains and valleys modeled on the interior; cameras disguised as bowler hats and many other everyday objects; the London Underground as a steam railway; safety coffins designed to prevent premature burial; unusual medical uses for electricity; the first traffic lights, which exploded a month after their erection in Westminster; and the birth and rapid rise to popularity of the cinema as well as many other ingenious inventions.

Weird Ideas That Work

The must-read summary of Robert Sutton's book: "Weird Ideas that Work: 11 1/2 Practices for Promoting, Managing and Sustaining Innovation". This summary of the ideas from Robert Sutton's book "Weird Ideas that Work" shows that almost all highly creative companies do weird things and refuse to do the same as everyone else. By doing this, creative companies consistently develop new ways of thinking and acting. In his book, the author presents 11 1/2 weird ideas for sparking business innovation. He also explains concrete ways to build an organisation where innovation flourishes and becomes a way of life. This summary will teach you the importance of creativity in your company and how you can start changing the way you do things in order to stay ahead. Added-value of this summary:  " Save time  " Understand key concepts  " Expand your business knowledge  To learn more, read "Weird Ideas that Work" and find out why you should become an expert in the art of innovation in order to stay on top.

The Journal of Philosophy

A New York Times Bestseller Oh, Florida! That name. That combination of sounds. Three simple syllables, and yet packing so many mixed messages. To some people, it's a paradise. To others, it's a punch line. As Oh, Florida! shows, it's both of these and, more important, it's a Petri dish, producing trends that end up influencing...

Florida is a state where the voters went for Barack Obama twice, yet elected a Tea Party candidate as governor. Florida is touted as a carefree paradise, yet it’s also known for its perils—alligators, sinkholes, pythons, hurricanes, and sharks, to name a few. It attracts 90 million visitors a year, some drawn by its impressive natural beauty, others bewitched by its manmade fantasies. Oh, Florida! explores those contradictions and shows how they fit together to make this the most interesting state. It is the first book to explore the reasons why Florida is so wild and weird—and why that’s okay. Florida couldn’t be Florida without that sense of the unpredictable, unexpected, and unusual lurking behind every palm tree. But there is far more to Florida than its sideshow freakiness. Oh, Florida! explains how Florida secretly, subtly influences all the other states in the Union, both for good and for ill.

The New Weird

Kirkus’ Best Fiction of 2017

From New York Times bestselling author Cory Doctorow, an epic tale of revolution, love, post-scarcity, and the end of death. “Walkaway is now the best contemporary example I know of, its utopia glimpsed after fascinatingly-extrapolated revolutionary struggle.”

William Gibson

Hubert Vernon Rudolph Clayton Irving Wilson Alva Anton Jeff Harley Timothy Curtis Cleveland Cecil Ollie Edmund Eli Wiley Marvin Ellis Espinoza known to his friends as Hubert, Etc was too old to be at that Communist party. But after watching the breakdown of modern society, he really has no where left to be except amongst the dregs of disaffected youth who party all night and heap scorn on the sheep they see on the morning commute. After falling in with Natalie, an ultra-rich heiress trying to escape the clutches of her repressive father, the two decide to give up fully on formal society and walk away. After all, now that anyone can design and print the basic necessities of life food, clothing, shelter from a computer, there seems to be little reason to toil within the system. It’s still a dangerous world out there, the empty lands wrecked by climate change, dead cities hollowed out by industrial flight, shadows hiding predators animal and human alike. Still, when the initial pioneer walkaways flourish, more people join them. Then the walkaways discover the one thing the ultra-rich have never been able to buy: how to beat death. Now it’s...

Walkaway
Summary: Weird Ideas that Work

Aliens. Ley lines. Water dowsing. Conspiracies and myths captivate imaginations and promise mystery and magic. Whether it's arguing about the moon landing hoax or a Frisbee-like Earth drifting through space, when held up to science and critical thinking, these ideas fall flat. In Weird Earth: Debunking Strange Ideas About Our Planet, Donald R. Prothero demystifies these conspiracies and offers answers to some of humanity's most outlandish questions. Applying his extensive scientific knowledge, Prothero corrects misinformation that con artists and quacks use to hoodwink others about geology—hollow earth, expanding earth, and bizarre earthquakes—and mystical and paranormal happenings—healing crystals, alien landings, and the gates of hell. By deconstructing wild claims such as prophesies of imminent natural disasters, Prothero provides a way for everyone to recognize dubious assertions. Prothero answers these claims with facts, offering historical and scientific context in a light-hearted manner that is accessible to everyone, no matter their background. With a careful layering of evidence in geology, archaeology, and biblical and historical records, Prothero's Weird Earth examines each conspiracy and myth and leaves no question unanswered.

Exotic and esoteric, The Weird plunges you into dark domains and brings you face to face with surreal monstrosities. You won't find any elves or wizards here — but you will find the biggest, boldest, and downright most peculiar stories from the last hundred years bound together in the biggest Weird collection ever assembled. The Weird features 110 stories by an all-star cast, from literary legends to international bestsellers to Booker Prize winners: including William Gibson, George R. R. Martin, Stephen King, Angela Carter, Kelly Link, Franz Kafka, China Miéville, Clive Barker, Haruki Murakami, M. R. James, Neil Gaiman, Mervyn Peake, and Michael Chabon. The Weird is the winner of the 2012 World Fantasy Award for Best Anthology. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Creative Problem Solving

The classic guidebook to everything from paper airplanes to spool tanks to slingshots is back in print, and is as fun, inventive, and charming as ever. How to Do Nothing literally tells "how to do nothing with nobody all alone by yourself" real things, fascinating things, the things that you did when you were a kid, or your parents did when they were kids. This is a book to free your kid from video games for a few hours, a handbook on the avoidance of boredom, a primer on the uses of solitude, a child's declaration of independence. If you don't remember how to make a spool tank, what to do with an old umbrella, whether "pennies" come before or after "spank the baby" in mumbly-peg, or how to make rubber-band guns, slings, or clamshell bracelets, it's OK because Robert Paul Smith has collected all of this and more in How to Do Nothing. It's a book for kids, but parents are not prohibited from reading it.
Step right up! Get your tickets for WTF?! An Economic Tour of the Weird! This rollicking tour through a museum of the world's weirdest practices is guaranteed to make you say, "WTF?!" Did you know that "preowned" wives were sold at auction in nineteenth-century England? That today, in Liberia, accused criminals sometimes drink poison to determine their fate? How about the fact that, for 250 years, Italy criminally prosecuted cockroaches and crickets? Do you wonder why? Then this tour is just for you! Join WTF?!'s cast of colorful characters as they navigate the museum, led by guide and economist Peter T. Leeson. From one exhibit to the next, you'll overhear Leeson's riotous exchanges with the patrons and learn how to use economic thinking to reveal the hidden sense behind seemingly senseless human behavior including your own. Leeson shows that far from "irrational" or "accidents of history," humanity's most outlandish rituals are ingenious solutions to pressing problems developed by clever people, driven by incentives, and tailor-made for their time and place. Can you handle getting schooled by the strange? Better hurry, the tour is about to start!

Beyond Weird

First published as a briefing packet for attendees of the LITA's President's Program at the 1991 ALA Annual Conference, where it contained 20 brief papers and a bibliography, this volume has been immeasurably enriched by the addition of the papers of the three main speakers futurists Hans Moraver, D
